

Tomas Grinkevicius

LEAD FULL STACK APPLICATION DEVELOPER

📍 Naples, Florida • Open to relocation ✉ grink.toma@gmail.com ☎ +1 (239) 270-1982 🏠 Grinkevicius

Full-stack software engineer with 7+ years at Collier County Public Schools, currently leading development and technical direction for Origin, a district-wide internal application. Most projects begin with understanding how a department works and finding a simpler way to support it with software. Daily work centers on PHP, Symfony, JavaScript, SQL Server, and PostgreSQL. Grinkt.com extends that experience through independent product development with TypeScript, React, Next.js, Prisma, and Vercel.

EXPERIENCE

Lead Application Developer

2020 to Present

Collier County Public Schools

- Lead development and technical direction of Origin, a district-wide internal application used by thousands of people.
- Own architecture decisions, plan larger technical changes, and guide implementation across PHP, Symfony, JavaScript, SQL Server, T-SQL, and PostgreSQL.
- Review code, maintain release quality, and solve complex application and data issues before they affect users.
- Work directly with district departments to understand their processes and turn real needs into practical software.

System Support Technician

2019 to 2020

Collier County Public Schools

- Supported staff and students across multiple schools, completing work orders for hardware, software, and network issues.
- Diagnosed problems, documented the work performed, and followed each request through resolution.

PROJECTS

Origin

PHP / Symfony / Vanilla JS / T-SQL / PostgreSQL

A district-wide application used by thousands of people to support school operations, student data, and reporting. I lead technical direction, architecture decisions, development, code review, and production support.

Grinkt.com

Next.js / TypeScript / React / Prisma / PostgreSQL / Vercel

Built from scratch as a modern full-stack application using Next.js, TypeScript, React, Prisma, PostgreSQL, and Vercel. It brings budgeting, health, planning, notes, trading, calendars, and AI tools into one platform.

TECHNICAL SKILLS

Modern Stack	TypeScript, JavaScript, React, Next.js, PostgreSQL, Prisma ORM, Vercel
Backend	PHP, Symfony, Node.js, REST APIs
Data	SQL, SQL Server, T-SQL, Relational data modeling, Database migrations
Engineering	System architecture, Authentication and authorization, Linux, Git, HTML, CSS, Tailwind CSS, PWA, Testing
Leadership	Technical direction, Code review, Release quality, Requirements analysis, Stakeholder collaboration
